Proven ability to architect, build, and deliver end-to-end e-commerce solutions for globally recognized enterprises across B2B and B2C domains. At Nendrasy's, acted as the technical point of contact for a 7-member team and independently owned 2 live production rollouts from inception to go-live. Brings a strong combination of technical depth, integration expertise, and the ability to lead technical discussions, mentor developers, and drive delivery excellence in agile environments. Open to Senior Engineer and Technical Specialist roles across India. · PROFESSIONAL EXPERIENCE · Senior SAP Commerce Developer Feb 2025 – Present · Samsung SIEL ShopApp · Nendrasy's · Hyderabad, India · Acted as the technical point of contact for a 7-member SAP Commerce development team — conducting code reviews, unblocking technical issues, guiding architecture decisions, and ensuring delivery quality. · Owned and delivered 2 end-to-end client rollouts that are currently live in production, driving all phases from requirements to deployment independently. · Integrated MoEngage with SAP Commerce Cloud 2211 to enable real-time order push notifications, significantly improving customer engagement across all touchpoints. · Architected event-based trigger configurations to manage the complete order lifecycle, ensuring timely, accurate, and reliable notification delivery at scale. · Implemented Single Sign-On (SSO) to deliver secure, frictionless user authentication across multiple platforms. · Developed and enhanced OCC APIs to support mobile application integration and strengthen frontend-backend communication. · Drove performance optimization and code quality initiatives using Java and SAP Commerce best practices, reducing response latency across key customer journeys. · Collaborated with business analysts and QA teams to ensure zero-defect production launches and smooth post-go-live support. · SAP Hybris Developer Apr 2024 – Feb 2025 · Samsung · Iksula · India · Integrated TBI Payment solutions for the Bulgaria market on Hybris 2211, delivering secure and compliant transaction processing for a new regional deployment. · Architected and integrated Jasper Reports to auto-generate detailed order summaries dispatched via email upon successful order placement. · Delivered VIP Membership functionality for the UK market, enabling exclusive subscriber discounts and driving measurable customer loyalty improvements. · L3 SAP Hybris Developer 2021 – 2024 · HPE (Hewlett Packard Enterprise) · Wipro · India · Designed and developed custom Hybris modules and storefront components on Hybris 2205, enhancing platform functionality to meet complex enterprise-grade requirements for a Fortune 500 client. · Owned the Addison Shipment Lead-Time integration end-to-end, surfacing real-time delivery estimates and improving the B2B purchase experience. · Implemented the Bundles Module, enabling flexible product bundling and upsell mechanics across HPE's B2B and B2C storefronts. · Delivered OKTA SSO integration for enterprise-grade authentication across all HPE digital commerce properties. · Integrated Recommendation API to surface AI-driven product suggestions, contributing to higher average order values. · Executed Backoffice customizations, PDP templates, and component enhancements, improving storefront flexibility and content management efficiency. · Participated in technical design discussions with solution architects, authored functional and technical flow documentation, and delivered KT to junior developers and support teams. · Championed code reviews, performance tuning, and QA alignment — consistently delivering on time and within enterprise quality standards. · SAP Hybris Developer 2019 – 2021 · DENTSPLY Sirona · Capgemini · India · Translated complex business requirements into precise technical specifications for a global dental equipment B2C e-commerce platform serving multiple countries on Hybris 1905. · Implemented core Hybris modules including Data Modelling, Impex,

CronJobs, Interceptors, Converters, Populators, and OCC Web Services using Java. · Drove agile sprint planning, backlog management, and delivery tracking, adapting rapidly to evolving client requirements. · Authored post-production Deployment Release Notes, standardizing procedures and significantly reducing go-live risk. · Actively contributed to development best practices and process improvement initiatives across the project team. · KEY ACHIEVEMENTS · Acted as technical point of contact for a 7-member team and independently delivered 2 live production rollouts at Nendrasys — demonstrating senior-level ownership and technical leadership. · Delivered SAP Commerce Cloud solutions for Fortune 500 clients including HPE and Samsung, with platforms serving millions of users globally. · Expanded e-commerce into new international markets (Bulgaria, UK) through targeted payment and membership feature integrations on Hybris 2211. · Reduced order notification latency by architecting an event-driven MoEngage integration, directly improving customer engagement metrics. · Mentored and upskilled junior developers through structured KT sessions at Wipro, reducing team onboarding time and improving sprint velocity. · Consistently contributed to architectural and technical design decisions alongside solution architects — beyond the scope of a standard developer role. · Certified in Claude AI Fundamentals (Anthropic) — demonstrating initiative to stay current with emerging AI technologies relevant to modern commerce platforms.
